Estrogen is known to play a part in the makeup of the saliva, which researchers believe can cause burning tongue once estrogen levels decrease. However, it will not treat vitamin B12 deficiency and will not prevent possible damage to the spinal cord.

On the other hand, mutant AHRR in combination with GSTM1 null genotype was significantly higher in patients (35.5) than in controls (19.3) (OR6.12).

The McCanns are asked how often they think of their daughter, who went missing when she was three.
